Subject Index to Volume 27

Activation

- Analytical solution to a growth problem with two moving boundaries, A. Braun,
A. Wokaun and H.-G. Hermanns 27 (2003) 47

Analytical model

- Approximate analytical model for solidification in a finite PCM storage with internal
fins, P. Lamberg and K. Sirén 27 (2003) 491

Angiogenesis

- A mathematical model of tissue replacement during epidermal wound healing,
S.A. Maggelakis 27 (2003) 189

Anisotropic elasticity

- Three-dimensional interfacial Green's functions in anisotropic bimetals, E. Pan and
B. Yang 27 (2003) 307

Anisotropy

- Non-linear $k-\varepsilon$ turbulence model results for flow over a building at full-scale,
N.G. Wright and G.J. Easom 27 (2003) 1013

ARMAX and NARMAX models

- Modelling and prediction of machining errors using ARMAX and NARMAX
structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Artificial neural networks

- The Box–Jenkins analysis and neural networks: prediction and time series modelling,
S. BuHamra, N. Smaoui and M. Gabr 27 (2003) 805

Austenite

- Prediction of temperature distribution and phase transformation on the run-out table in
the process of hot strip rolling, S. Serajzadeh 27 (2003) 861

Autocorrelation functions

- Modeling autocorrelation functions of self-similar teletraffic in communication networks
based on optimal approximation in Hilbert space, M. Li, W. Zhao, W. Jia, D. Long
and C.-H. Chi 27 (2003) 155

Automated storage and retrieval systems

- Design optimization models for storage and retrieval systems using rail guided vehicles,
C.J. Malmborg 27 (2003) 929

Autoregressive integrated moving average model

- The Box-Jenkins analysis and neural networks: prediction and time series modelling,
S. BuHamra, N. Smaoui and M. Gabr 27 (2003) 805

Axisymmetric

- A note on laminar axisymmetric and two-dimensional glycerol plumes, A. Pantokratoras 27 (2003) 889

Back propagation computation

- A back propagation algorithm to estimate the parameters of non-linear dynamic rational
models, Q.M. Zhu 27 (2003) 169

BEM

- A BEM formulation for inhomogeneous potential problems by particular integrals,
K.H. Park 27 (2003) 293

Bending relationships

- Exact mixed-classical solutions for the bending analysis of shear deformable rectangular
plates, A.M. Zenkour 27 (2003) 515

Bending response

- Bending response of a fiber-reinforced viscoelastic arched bridge model, M.N.M. Allam
and A.M. Zenkour 27 (2003) 233

Block Gauss-Seidel iteration method

- A QBD approach to evolutionary game theory, L. Tadj and A. Touzene 27 (2003) 913

Block Gaussian elimination

- A QBD approach to evolutionary game theory, L. Tadj and A. Touzene 27 (2003) 913

Boundary value problem

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Box-Jenkins analysis

- The Box-Jenkins analysis and neural networks: prediction and time series modelling,
S. BuHamra, N. Smaoui and M. Gabr 27 (2003) 805

Buckling constraints

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

Buildings

- Non-linear $k-\epsilon$ turbulence model results for flow over a building at full-scale,
N.G. Wright and G.J. Easom 27 (2003) 1013

Buoyancy

- Large eddy simulation of diffusion of a buoyancy source in ambient water, C.W. Li and F.X. Ma 27 (2003) 649

Cavity flow

- Study of the oscillatory regime of a turbulent plane jet impinging in a rectangular cavity, A. Mataoui, R. Schiestel and A. Salem 27 (2003) 89

Chemical reaction engineering

- Analytical solution to a growth problem with two moving boundaries, A. Braun, A. Wokaun and H.-G. Hermanns 27 (2003) 47

Circular disks

- An algorithm for computing the distance between two circular disks, H.A. Almohamad and S.Z. Selim 27 (2003) 115

Classical thin plate theory

- Exact mixed-classical solutions for the bending analysis of shear deformable rectangular plates, A.M. Zenkour 27 (2003) 515

Closed-form solutions

- An algorithm for computing the distance between two circular disks, H.A. Almohamad and S.Z. Selim 27 (2003) 115

Compressible inviscid fluid

- Transmitting boundary conditions suitable for analysis of dam-reservoir interaction and wave load problems, M. Çetin and Y. Mengi 27 (2003) 451

Constrained

- Hybrid functions approach for linearly constrained quadratic optimal control problems, H.R. Marzban and M. Razzaghi 27 (2003) 471

Constrained optimization

- Special sales with guaranteed minimum duration but uncertain termination date, F.J. Arcelus, T.P.M. Pakkala and G. Srinivasan 27 (2003) 677

Contention-collision elimination access mode

- On the IInd model of contention-collision elimination access mode in star LAN, Z. Lu, M. Lu, D. Zhao and L. Wang 27 (2003) 899

Continuous time Markov system

- Modeling of continuous time homogeneous Markov system with fixed size as elastic solid: the two-dimensional case, G. Tsaklidis and K.P. Soldatos 27 (2003) 877

Control

- An analysis of the M/G/1 system with N and T policy, S. Hur, J. Kim and C. Kang 27 (2003) 665

Control volume method

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

Cost calculation

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

Cost model

- The optimal control of an M/G/1 queueing system with server startup and two vacation types, J.-C. Ke 27 (2003) 437

Cost models

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmborg 27 (2003) 929

Cycle time

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmborg 27 (2003) 929

3D bimerials

- Three-dimensional interfacial Green's functions in anisotropic bimerials, E. Pan and B. Yang 27 (2003) 307

3-D thermomechanical model

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

Delay payments

- An EOQ model for deteriorating items under supplier credits linked to ordering quantity, C.-T. Chang, L.-Y. Ouyang and J.-T. Teng 27 (2003) 983

Derivative approximation

- Approximation of function and its derivatives using radial basis function networks, N. Mai-Duy and T. Tran-Cong 27 (2003) 197

Deteriorating items

- An EOQ model for deteriorating items under supplier credits linked to ordering quantity, C.-T. Chang, L.-Y. Ouyang and J.-T. Teng 27 (2003) 983

Deterioration

- The effects of learning on the optimal production lot size for deteriorating and partially backordered items with time varying demand and deterioration rates, Z.T. Balkhi 27 (2003) 763

Deterministic routing

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Diametral errors

- Finite element and experimental studies of diametral errors in cantilever bar turning, A.-V. Phan, L. Baron, J.R.R. Mayer and G. Cloutier 27 (2003) 221

Differential unit

- Inventory of a differential item sold from two shops under single management with shortages and variable demand, K. Das and M. Maiti 27 (2003) 535

Diffraction grating

- Modelling of relief of phase reflection diffraction grating, M. Margelevičius, V. Grigaliūnas, H. Pranevičius and J. Margelevičius 27 (2003) 1035

Diffraction optical element

- Modelling of relief of phase reflection diffraction grating, M. Margelevičius, V. Grigaliūnas, H. Pranevičius and J. Margelevičius 27 (2003) 1035

Diffusivity

- Dispersion of mass by two-dimensional homogeneous and incompressible Çinlar flows, M. Çağlar 27 (2003) 997

Dispatching

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmberg 27 (2003) 929

Dispersion

- Dispersion of mass by two-dimensional homogeneous and incompressible Çinlar flows, M. Çağlar 27 (2003) 997

Distance computation

- An algorithm for computing the distance between two circular disks, H.A. Almohamad and S.Z. Selim 27 (2003) 115

Distribution

- An analysis of the M/G/1 system with N and T policy, S. Hur, J. Kim and C. Kang 27 (2003) 665

Double-diffusivity

- The double-diffusivity heat transfer model for grain stores incorporating microwave heating, A. Antic and J.M. Hill 27 (2003) 629

DQ

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

DQEM

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

Early-age concrete

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

EDQ

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

Electronic packaging

- Mathematical modeling for the solidification heat-transfer phenomena during the reflow process of lead-tin alloy solder joint in electronics packaging, Y.-F. Chiu, Y.-L. Tsai and W.-S. Hwang 27 (2003) 565

Element free Galerkin method

- Improvements of generalized finite difference method and comparison with other meshless method, L. Gavete, M.L. Gavete and J.J. Benito 27 (2003) 831

Energy balance

- Determination of specific heat with a simple inverse approach, P.J. Bendeich, J.M. Barry and W. Payten 27 (2003) 337

Epidermal wound healing

- A mathematical model of tissue replacement during epidermal wound healing, S.A. Maggelakis 27 (2003) 189

Evolutionary game theory

- A QBD approach to evolutionary game theory, L. Tadj and A. Touzene 27 (2003) 913

Exactly solvable growth model

- Analytical solution to a growth problem with two moving boundaries, A. Braun, A. Wokaun and H.-G. Hermanns 27 (2003) 47

Extensible marine cables

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheepsakul, N. Srinil and P. Petchpeart 27 (2003) 781

Fatigue

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

FDTD

- A high definition, finite difference time domain method, H. Zhao, S. Crozier and F. Liu 27 (2003) 409

FEMLAB

- Approximate analytical model for solidification in a finite PCM storage with internal fins, P. Lamberg and K. Sirén 27 (2003) 491

Filling simulation

- Filling simulation and gas penetration modeling for gas-assisted injection molding, H. Zhou and D. Li 27 (2003) 849

Film growth

- Analytical solution to a growth problem with two moving boundaries, A. Braun, A. Wokaun and H.-G. Hermanns 27 (2003) 47

Finance

- An EOQ model for deteriorating items under supplier credits linked to ordering quantity, C.-T. Chang, L.-Y. Ouyang and J.-T. Teng 27 (2003) 983

Finite element method

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheepeksakul, N. Srinil and P. Petchpeart 27 (2003) 781
Optimal structural design of a planar parallel platform for machining, C.S. Long, J.A. Snyman and A.A. Groenwold 27 (2003) 581

Finite elements

- Finite element and experimental studies of diametral errors in cantilever bar turning, A.-V. Phan, L. Baron, J.R.R. Mayer and G. Cloutier 27 (2003) 221

Finite-part integral

- Three-dimensional interfacial Green's functions in anisotropic bimetals, E. Pan and B. Yang 27 (2003) 307

Forecasting

- Modelling and prediction of machining errors using ARMAX and NARMAX structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Fourier optics

- Modelling of relief of phase reflection diffraction grating, M. Margelevičius, V. Grigaliūnas, H. Pranevičius and J. Margelevičius 27 (2003) 1035

Full-scale

- Non-linear $k-\varepsilon$ turbulence model results for flow over a building at full-scale,
N.G. Wright and G.J. Easom 27 (2003) 1013

Function approximation

- Approximation of function and its derivatives using radial basis function networks,
N. Mai-Duy and T. Tran-Cong 27 (2003) 197

Gas-assisted injection molding

- Filling simulation and gas penetration modeling for gas-assisted injection molding,
H. Zhou and D. Li 27 (2003) 849

GDQ

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and
the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

GDQEM

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and
the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

Generalized finite difference method

- Improvements of generalized finite difference method and comparison with other
meshless method, L. Gavete, M.L. Gavete and J.J. Benito 27 (2003) 831

Global approximation

- Approximation of function and its derivatives using radial basis function networks,
N. Mai-Duy and T. Tran-Cong 27 (2003) 197

Global shape function

- A BEM formulation for inhomogeneous potential problems by particular integrals,
K.H. Park 27 (2003) 293

Glycerol

- A note on laminar axisymmetric and two-dimensional glycerol plumes, A. Pantokratoras 27 (2003) 889

Grain

- The double-diffusivity heat transfer model for grain stores incorporating microwave
heating, A. Antic and J.M. Hill 27 (2003) 629

Grid generation

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Guided vehicles

- Design optimization models for storage and retrieval systems using rail guided vehicles,
C.J. Malmberg 27 (2003) 929

Heat flux

- Determination of specific heat with a simple inverse approach, P.J. Bendeich, J.M. Barry and W. Payten 27 (2003) 337

Heat transfer

- Approximate analytical model for solidification in a finite PCM storage with internal fins, P. Lamberg and K. Sirén 27 (2003) 491
 The double-diffusivity heat transfer model for grain stores incorporating microwave heating, A. Antic and J.M. Hill 27 (2003) 629

Hessenberg matrix

- A QBD approach to evolutionary game theory, L. Tadj and A. Touzene 27 (2003) 913

Heuristic

- k*-Interchange heuristic as an optimization procedure for material handling applications, P.A. Makris and I.G. Giakoumakis 27 (2003) 345

High definition finite difference time domain

- A high definition, finite difference time domain method, H. Zhao, S. Crozier and F. Liu 27 (2003) 409

Hot rolling

- Prediction of temperature distribution and phase transformation on the run-out table in the process of hot strip rolling, S. Serajzadeh 27 (2003) 861

Human body model

- A high definition, finite difference time domain method, H. Zhao, S. Crozier and F. Liu 27 (2003) 409

Hybrid

- Hybrid functions approach for linearly constrained quadratic optimal control problems, H.R. Marzban and M. Razzaghi 27 (2003) 471

Hydration

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

Hyperbolic heat conduction

- Modelling hyperbolic heat conduction in a finite medium with periodic thermal disturbance and surface radiation, C.-C. Yen and C.-Y. Wu 27 (2003) 397

Hypercubes

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Inhomogeneous potential problems

- A BEM formulation for inhomogeneous potential problems by particular integrals, K.H. Park 27 (2003) 293

Integral

- Tau numerical solution of Fredholm integro-differential equations with arbitrary polynomial bases, S.M. Hosseini and S. Shahmorad 27 (2003) 145

Integral equation

- Modelling hyperbolic heat conduction in a finite medium with periodic thermal disturbance and surface radiation, C.-C. Yen and C.-Y. Wu 27 (2003) 397

Integro-differential equations

- Tau numerical solution of Fredholm integro-differential equations with arbitrary polynomial bases, S.M. Hosseini and S. Shahmorad 27 (2003) 145

Interconnection networks

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Interfacial Green's functions

- Three-dimensional interfacial Green's functions in anisotropic bimaterials, E. Pan and B. Yang 27 (2003) 307

Interleaving

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmberg 27 (2003) 929

Inventory

- An EOQ model for deteriorating items under supplier credits linked to ordering quantity, C.-T. Chang, L.-Y. Ouyang and J.-T. Teng 27 (2003) 983
 Inventory of a differential item sold from two shops under single management with shortages and variable demand, K. Das and M. Maiti 27 (2003) 535
 The effects of learning on the optimal production lot size for deteriorating and partially backordered items with time varying demand and deterioration rates, Z.T. Balkhi 27 (2003) 763

Inventory control

- Special sales with guaranteed minimum duration but uncertain termination date, F.J. Arcelus, T.P.M. Pakkala and G. Srinivasan 27 (2003) 677

Inverse problem

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

ISOPE algorithm

- Comparison of methods for estimating real process derivatives in on-line optimization, M. Mansour and J.E. Ellis 27 (2003) 275

Iterative solutions

- An algorithm for computing the distance between two circular disks, H.A. Almohamad and S.Z. Selim 27 (2003) 115

k- ϵ

- Non-linear *k- ϵ* turbulence model results for flow over a building at full-scale,
N.G. Wright and G.J. Easom 27 (2003) 1013

k-Interchange

- k*-Interchange heuristic as an optimization procedure for material handling applications,
P.A. Makris and I.G. Giakoumakis 27 (2003) 345

Lévy-type approach

- Exact mixed-classical solutions for the bending analysis of shear deformable rectangular
plates, A.M. Zenkour 27 (2003) 515

Lagrangian velocity

- Dispersion of mass by two-dimensional homogeneous and incompressible Çinlar flows,
M. Çağlar 27 (2003) 997

Lambert W

- Analytical solution to a growth problem with two moving boundaries, A. Braun,
A. Wokaun and H.-G. Hermanns 27 (2003) 47

Large eddy simulation

- Large eddy simulation of diffusion of a buoyancy source in ambient water, C.W. Li and
F.X. Ma 27 (2003) 649

Lead-tin alloy

- Mathematical modeling for the solidification heat-transfer phenomena during the reflow
process of lead-tin alloy solder joint in electronics packaging, Y.-F. Chiu, Y.-L. Tsai
and W.-S. Hwang 27 (2003) 565

Learning process

- The effects of learning on the optimal production lot size for deteriorating and partially
backordered items with time varying demand and deterioration rates, Z.T. Balkhi 27 (2003) 763

Levenberg-Marquardt

- Modelling of relief of phase reflection diffraction grating, M. Margelevičius,
V. Grigaliūnas, H. Pranevičius and J. Margelevičius 27 (2003) 1035

Linearly elastic anisotropic media

- Modeling of continuous time homogeneous Markov system with fixed size as elastic
solid: the two-dimensional case, G. Tsaklidis and K.P. Soldatos 27 (2003) 877

Liquid metal spraying

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Long-range dependence

- Modeling autocorrelation functions of self-similar teletraffic in communication networks based on optimal approximation in Hilbert space, M. Li, W. Zhao, W. Jia, D. Long and C.-H. Chi 27 (2003) 155

Lot-size

- An EOQ model for deteriorating items under supplier credits linked to ordering quantity, C.-T. Chang, L.-Y. Ouyang and J.-T. Teng 27 (2003) 983

Machine error compensation

- Modelling and prediction of machining errors using ARMAX and NARMAX structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Macrophage-derived growth factor

- A mathematical model of tissue replacement during epidermal wound healing, S.A. Maggelakis 27 (2003) 189

Mass flux

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Mass transport

- Dispersion of mass by two-dimensional homogeneous and incompressible Çinlar flows, M. Çağlar 27 (2003) 997

Matched asymptotic expansion

- Turbulent, mixing of a scalar quantity in a 2-d mixing layer using matched asymptotic expansions, L.J. De Chant 27 (2003) 955

Matching asymptotic expansion method

- Filling simulation and gas penetration modeling for gas-assisted injection molding, H. Zhou and D. Li 27 (2003) 849

Material handling

- k-Interchange heuristic as an optimization procedure for material handling applications, P.A. Makris and I.G. Giakoumakis 27 (2003) 345

Mathematical modeling

- Prediction of temperature distribution and phase transformation on the run-out table in the process of hot strip rolling, S. Serajzadeh 27 (2003) 861

Mathematical modelling

- On the IInd model of contention-collision elimination access mode in star LAN, Z. Lu, M. Lu, D. Zhao and L. Wang 27 (2003) 899

Mathematical simulation

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheeepsakul, N. Srinil and P. Petchpeart 27 (2003) 781

Meshless

- Improvements of generalized finite difference method and comparison with other meshless method, L. Gavete, M.L. Gavete and J.J. Benito 27 (2003) 831

Microwave heating

- The double-diffusivity heat transfer model for grain stores incorporating microwave heating, A. Antic and J.M. Hill 27 (2003) 629

Mixed thick plate theory

- Exact mixed-classical solutions for the bending analysis of shear deformable rectangular plates, A.M. Zenkour 27 (2003) 515

Model structure detection

- A back propagation algorithm to estimate the parameters of non-linear dynamic rational models, Q.M. Zhu 27 (2003) 169

Model-based

- Comparison of methods for estimating real process derivatives in on-line optimization, M. Mansour and J.E. Ellis 27 (2003) 275

MRI field gradients

- A high definition, finite difference time domain method, H. Zhao, S. Crozier and F. Liu 27 (2003) 409

Multicomputers

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Multidisciplinary design optimisation

- Optimisation of road vehicle passive suspension systems. Part 1. Optimisation algorithm and vehicle model, A.F. Naudé and J.A. Snyman 27 (2003) 249
Optimisation of road vehicle passive suspension systems. Part 2. Qualification and case study, A.F. Naudé and J.A. Snyman 27 (2003) 263

Neovascularization

- A mathematical model of tissue replacement during epidermal wound healing, S.A. Maggelakis 27 (2003) 189

Neural networks

- Modelling and prediction of machining errors using ARMAX and NARMAX structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Non-Fourier effect

- Modelling hyperbolic heat conduction in a finite medium with periodic thermal disturbance and surface radiation, C.-C. Yen and C.-Y. Wu 27 (2003) 397

Non-linear rational models

- A back propagation algorithm to estimate the parameters of non-linear dynamic rational models, Q.M. Zhu 27 (2003) 169

On-line optimization

- Comparison of methods for estimating real process derivatives in on-line optimization, M. Mansour and J.E. Ellis 27 (2003) 275

Optimal approximation

- Modeling autocorrelation functions of self-similar teletraffic in communication networks based on optimal approximation in Hilbert space, M. Li, W. Zhao, W. Jia, D. Long and C.-H. Chi 27 (2003) 155

Optimal control

- Hybrid functions approach for linearly constrained quadratic optimal control problems, H.R. Marzban and M. Razzaghi 27 (2003) 471

Optimal design

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

Optimisation algorithm

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

Optimization

- An analysis of the M/G/1 system with N and T policy, S. Hur, J. Kim and C. Kang 27 (2003) 665
 k -Interchange heuristic as an optimization procedure for material handling applications, P.A. Makris and I.G. Giakoumakis 27 (2003) 345

Optimization algorithms

- Optimal structural design of a planar parallel platform for machining, C.S. Long, J.A. Snyman and A.A. Groenwold 27 (2003) 581

Order-picking

- k -Interchange heuristic as an optimization procedure for material handling applications, P.A. Makris and I.G. Giakoumakis 27 (2003) 345

Oscillatory flow

- Study of the oscillatory regime of a turbulent plane jet impinging in a rectangular cavity, A. Mataoui, R. Schiestel and A. Salem 27 (2003) 89

Parameter estimation

- A back propagation algorithm to estimate the parameters of non-linear dynamic rational models, Q.M. Zhu 27 (2003) 169

Particular integrals

- A BEM formulation for inhomogeneous potential problems by particular integrals, K.H. Park 27 (2003) 293

Passive suspension systems

- Optimisation of road vehicle passive suspension systems. Part 1. Optimisation algorithm and vehicle model, A.F. Naudé and J.A. Snyman 27 (2003) 249
Optimisation of road vehicle passive suspension systems. Part 2. Qualification and case study, A.F. Naudé and J.A. Snyman 27 (2003) 263

PCM

- Approximate analytical model for solidification in a finite PCM storage with internal fins, P. Lamberg and K. Sirén 27 (2003) 491

Performance modelling

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Periodic thermal disturbance

- Modelling hyperbolic heat conduction in a finite medium with periodic thermal disturbance and surface radiation, C.-C. Yen and C.-Y. Wu 27 (2003) 397

Perturbation method

- Filling simulation and gas penetration modeling for gas-assisted injection molding, H. Zhou and D. Li 27 (2003) 849

Perturbed Burgers' equation

- A note on Demiray's solution to the perturbed Burgers' equation, E.J. Parkes 27 (2003) 487

Planar parallel manipulator

- Optimal structural design of a planar parallel platform for machining, C.S. Long, J.A. Snyman and A.A. Groenwold 27 (2003) 581

Plume

- A note on laminar axisymmetric and two-dimensional glycerol plumes, A. Pantokratoras 27 (2003) 889

Poisson equation

- A BEM formulation for inhomogeneous potential problems by particular integrals, K.H. Park 27 (2003) 293

Pricing

- Special sales with guaranteed minimum duration but uncertain termination date,
F.J. Arcelus, T.P.M. Pakkala and G. Srinivasan 27 (2003) 677

Primary shop

- Inventory of a differential item sold from two shops under single management with
shortages and variable demand, K. Das and M. Maiti 27 (2003) 535

Process derivatives

- Comparison of methods for estimating real process derivatives in on-line optimization,
M. Mansour and J.E. Ellis 27 (2003) 275

Production lot size model

- The effects of learning on the optimal production lot size for deteriorating and partially
backordered items with time varying demand and deterioration rates, Z.T. Balkhi 27 (2003) 763

QBD

- A QBD approach to evolutionary game theory, L. Tadj and A. Touzene 27 (2003) 913

Quadratic thickness variation

- Bending response of a fiber-reinforced viscoelastic arched bridge model, M.N.M. Allam
and A.M. Zenkour 27 (2003) 233

Queue

- The optimal control of an M/G/1 queueing system with server startup and two vacation
types, J.-C. Ke 27 (2003) 437

Queueing

- An analysis of the M/G/1 system with N and T policy, S. Hur, J. Kim and C. Kang 27 (2003) 665

Radial basis function networks

- Approximation of function and its derivatives using radial basis function networks,
N. Mai-Duy and T. Tran-Cong 27 (2003) 197

Radiation of waves

- Transmitting boundary conditions suitable for analysis of dam-reservoir interaction and
wave load problems, M. Çetin and Y. Mengi 27 (2003) 451

Recursive extended least square

- Modelling and prediction of machining errors using ARMAX and NARMAX
structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Recursive parameter estimation

- Modelling and prediction of machining errors using ARMAX and NARMAX
structures, E.H.K. Fung, Y.K. Wong, H.F. Ho and M.P. Mignolet 27 (2003) 611

Reflow process

- Mathematical modeling for the solidification heat-transfer phenomena during the reflow process of lead-tin alloy solder joint in electronics packaging, Y.-F. Chiu, Y.-L. Tsai and W.-S. Hwang 27 (2003) 565

Reinforced viscoelastic beams

- Bending response of a fiber-reinforced viscoelastic arched bridge model, M.N.M. Allam and A.M. Zenkour 27 (2003) 233

Rheology

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

Run-out table

- Prediction of temperature distribution and phase transformation on the run-out table in the process of hot strip rolling, S. Serajzadeh 27 (2003) 861

Scalar transport

- Turbulent, mixing of a scalar quantity in a 2-d mixing layer using matched asymptotic expansions, L.J. De Chant 27 (2003) 955

Scattered data interpolation

- Approximation of function and its derivatives using radial basis function networks, N. Mai-Duy and T. Tran-Cong 27 (2003) 197

Secondary shop

- Inventory of a differential item sold from two shops under single management with shortages and variable demand, K. Das and M. Maiti 27 (2003) 535

Self-similar

- Turbulent, mixing of a scalar quantity in a 2-d mixing layer using matched asymptotic expansions, L.J. De Chant 27 (2003) 955

Shooting-optimization method

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheepsakul, N. Srinil and P. Petchpeart 27 (2003) 781

Simple inverse thermal

- Determination of specific heat with a simple inverse approach, P.J. Bendeich, J.M. Barry and W. Payten 27 (2003) 337

Singularities

- Improvements of generalized finite difference method and comparison with other meshless method, L. Gavete, M.L. Gavete and J.J. Benito 27 (2003) 831

Small parameter and effective moduli

- Bending response of a fiber-reinforced viscoelastic arched bridge model, M.N.M. Allam and A.M. Zenkour 27 (2003) 233

Solder joint

- Mathematical modeling for the solidification heat-transfer phenomena during the reflow process of lead-tin alloy solder joint in electronics packaging, Y.-F. Chiu, Y.-L. Tsai and W.-S. Hwang 27 (2003) 565

Solidification

- Mathematical modeling for the solidification heat-transfer phenomena during the reflow process of lead-tin alloy solder joint in electronics packaging, Y.-F. Chiu, Y.-L. Tsai and W.-S. Hwang 27 (2003) 565

Specific heat

- Determination of specific heat with a simple inverse approach, P.J. Bendeich, J.M. Barry and W. Payten 27 (2003) 337

Spraying efficiency

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Star LAN

- On the IInd model of contention-collision elimination access mode in star LAN, Z. Lu, M. Lu, D. Zhao and L. Wang 27 (2003) 899

Startup

- The optimal control of an M/G/1 queueing system with server startup and two vacation types, J.-C. Ke 27 (2003) 437

Stewart platform

- Optimal structural design of a planar parallel platform for machining, C.S. Long, J.A. Snyman and A.A. Groenwold 27 (2003) 581

Stochastic (population) systems

- Modeling of continuous time homogeneous Markov system with fixed size as elastic solid: the two-dimensional case, G. Tsaklidis and K.P. Soldatos 27 (2003) 877

Stochastic flow

- Dispersion of mass by two-dimensional homogeneous and incompressible Çinlar flows, M. Çağlar 27 (2003) 997

Storage cranes

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmborg 27 (2003) 929

Storage rack

- Design optimization models for storage and retrieval systems using rail guided vehicles,
C.J. Malmborg 27 (2003) 929

Stroh formalism

- Three-dimensional interfacial Green's functions in anisotropic bimaterials, E. Pan and
B. Yang 27 (2003) 307

Structural optimisation

- Optimal design of a hoist structure frame, P.E. Uys, K. Jarmai and J. Farkas 27 (2003) 963

Surface radiation

- Modelling hyperbolic heat conduction in a finite medium with periodic thermal disturbance and surface radiation, C.-C. Yen and C.-Y. Wu 27 (2003) 397

Tau method

- Tau numerical solution of Fredholm integro-differential equations with arbitrary polynomial bases, S.M. Hosseini and S. Shahmorad 27 (2003) 145

Teletraffic modeling

- Modeling autocorrelation functions of self-similar teletraffic in communication networks based on optimal approximation in Hilbert space, M. Li, W. Zhao, W. Jia, D. Long and C.-H. Chi 27 (2003) 155

Thermals

- Large eddy simulation of diffusion of a buoyancy source in ambient water, C.W. Li and F.X. Ma 27 (2003) 649

Three-dimensional marine cable model

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheeepsakul, N. Srinil and P. Petchpeart 27 (2003) 781

Throughput

- Design optimization models for storage and retrieval systems using rail guided vehicles, C.J. Malmborg 27 (2003) 929

Time series modelling

- The Box-Jenkins analysis and neural networks: prediction and time series modelling, S. BuHamra, N. Smaoui and M. Gabr 27 (2003) 805

Trade and retail promotions

- Special sales with guaranteed minimum duration but uncertain termination date, F.J. Arcelus, T.P.M. Pakkala and G. Srinivasan 27 (2003) 677

Transfinite interpolation

- An inverse problem in modelling liquid metal spraying, Z. Djurić and P. Grant 27 (2003) 379

Transition conditions

- Buckling equilibrium equations of arbitrarily loaded nonprismatic composite beams and the DQEM buckling analysis using EDQ, C.-N. Chen 27 (2003) 27

Transmitting boundary conditions

- Transmitting boundary conditions suitable for analysis of dam-reservoir interaction and wave load problems, M. Çetin and Y. Mengi 27 (2003) 451

Turbulence

- Study of the oscillatory regime of a turbulent plane jet impinging in a rectangular cavity, A. Mataoui, R. Schiestel and A. Salem 27 (2003) 89

Turbulence modelling

- Non-linear $k-\varepsilon$ turbulence model results for flow over a building at full-scale, N.G. Wright and G.J. Easom 27 (2003) 1013
- Study of the oscillatory regime of a turbulent plane jet impinging in a rectangular cavity, A. Mataoui, R. Schiestel and A. Salem 27 (2003) 89

Turbulent mixing layer

- Turbulent, mixing of a scalar quantity in a 2-d mixing layer using matched asymptotic expansions, L.J. De Chant 27 (2003) 955

Turning modeling

- Finite element and experimental studies of diametral errors in cantilever bar turning, A.-V. Phan, L. Baron, J.R.R. Mayer and G. Cloutier 27 (2003) 221

Two dimensional

- Transmitting boundary conditions suitable for analysis of dam-reservoir interaction and wave load problems, M. Çetin and Y. Mengi 27 (2003) 451

Two-dimensional

- A note on laminar axisymmetric and two-dimensional glycerol plumes, A. Pantokratoras 27 (2003) 889

Two-dimensional vehicle model

- Optimisation of road vehicle passive suspension systems. Part 1. Optimisation algorithm and vehicle model, A.F. Naudé and J.A. Snyman 27 (2003) 249
- Optimisation of road vehicle passive suspension systems. Part 2. Qualification and case study, A.F. Naudé and J.A. Snyman 27 (2003) 263

Uncertain duration and promotion periods

- Special sales with guaranteed minimum duration but uncertain termination date, F.J. Arcelus, T.P.M. Pakkala and G. Srinivasan 27 (2003) 677

Vacation

- The optimal control of an M/G/1 queueing system with server startup and two vacation types, J.-C. Ke 27 (2003) 437

Variable demand

- Inventory of a differential item sold from two shops under single management with shortages and variable demand, K. Das and M. Maiti 27 (2003) 535

Variable properties

- A note on laminar axisymmetric and two-dimensional glycerol plumes, A. Pantokratoras 27 (2003) 889

Variational approach

- A variational approach for three-dimensional model of extensible marine cables with specified top tension, S. Chucheeprakul, N. Srinil and P. Petchpeart 27 (2003) 781

Virtual channels

- A mathematical model of deterministic wormhole routing in hypercube multicomputers using virtual channels, H. Sarbazi-Azad 27 (2003) 943

Viscoelasticity

- A numerical model for predicting the thermomechanical conditions during hydration of early-age concrete, J.H. Hattel and J. Thorborg 27 (2003) 1

Warehouse

- k*-Interchange heuristic as an optimization procedure for material handling applications, P.A. Makris and I.G. Giakoumakis 27 (2003) 345

Wind engineering

- Non-linear $k-\varepsilon$ turbulence model results for flow over a building at full-scale, N.G. Wright and G.J. Easom 27 (2003) 1013

Workpiece deflections

- Finite element and experimental studies of diametral errors in cantilever bar turning, A.-V. Phan, L. Baron, J.R.R. Mayer and G. Cloutier 27 (2003) 221
